## **DETAILED ACTION**

### ***Election/Restrictions***

This application contains claims directed to the following patentably distinct species:

Species I: Fig. 1-5,8

Species II: Fig. 6,7,9

The species are independent or distinct because Species I comprises telescoping rods, which use locking pins in order to stabilize the bracing devices. The plurality of bracing members are held together using a coupling device, which extends through the center of the bracing members, perpendicular to the bracing members. Species II is a bracing system that uses a vertical and horizontal configuration to support a window frame. In this embodiment of the invention, bracing clips are used to hold the bracing members in their positions. The bracing clips are applied in many locations throughout the configuration.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

Art Unit: 3635

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
